E-01575A-08 and E-01575A-09-0453

Dear Chairman Mayes and Commissioners Stump, Pierce, Newman and Kennedy:

Since I am unable to attend the public comment session in regard to the above mentioned cases on Wednesday, March 24, 2010, please accept this letter in my absence. **I am opposed to the SSVEC 69kV line across the Babocomari Ranch.** SSVEC has not demonstrated the need for this line. We do not have 270 hours of outages a year. We have had more snow, wind and bad weather this year than usual and our reliability is better than in the past. Their misrepresentation of the facts is well documented. I believe there are other motives, some have mentioned the new mine that is being developed in Patagonia.

The current economic conditions of this country and of my community do not warrant such wasteful spending. I understand they have spent around one million dollars fighting the very cooperative members they serve. Renewable energy and demand side management programs will better serve the needs of my community. Please support the people you serve and vote to **STOP the 69kV line.** There is no emergency, don't be pressured by this big, greedy business that pretends to have its cooperative member's interest at heart.

Sincerely,

Jenny Downing
